SUMMARY

Technical Writer and Knowledge Architect with 9+ years of experience and 12 years in the IT industry, specializing in documentation for SaaS, IaaS, and Fintech companies. Led information architecture restructuring and documentation migration projects to make content AI-agent and LLM-ready. Created over 40 API guides and customer-facing articles, improving user documentation and reducing support tickets. Delivered 110 migration projects with a 9.6/10 customer satisfaction score.

PROFESSIONAL EXPERIENCE

Technical Writer & Knowledge Architect Independent Consultant

Apr 2026 - present

Independent consulting practice focused on building documentation and knowledge systems that help organizations capture, structure, and scale operational knowledge.

- Built documentation and knowledge systems from scratch, transforming fragmented operational processes into structured, scalable workflows.
- Developed brand voice, writing guidelines, and content standards.
- Structured content for AI enablement — machine-readable docs, prompt-ready content, internal AI support workflows.

Senior Technical Writer Bolt (bolt.com)

Mar 2025 - Apr 2026

Bolt is a technology company revolutionizing e-commerce with lightning-fast, secure checkout solutions.

- Led an information architecture redesign to make documentation AI-agent and LLM-readable — evaluated and prototyped migration to Fumadocs, initiating the transition of mobile documentation.
- Owned and maintained Bolt's documentation system across user-facing and developer products, ensuring content accuracy and consistency with product changes.
- Partnered with the Support team to identify and document recurring issue patterns, reducing support load and improving chatbot performance.
- Authored developer documentation for Bolt Connect and user-facing documentation for the Bolt Mobile App.
- Acted as product owner on a cross-functional Support-Engineering-Design project — wrote system requirements, prepared internal documentation, and delivered the project spec to the Engineering lead for implementation.

Senior Technical Writer Tuum

Mar 2021 - Apr 2025

Tuum is a cloud-native, next-generation core banking platform built on decades of industry expertise.

- Developed and implemented a strategy for creating technical content from scratch, including writing and editing guidelines.
- Established a standard format for API and end-user documentation that was adopted company-wide.
- Authored 24 developer articles and 16 user manuals.
- Created 4 sections of API cookbooks.
- Successfully migrated documentation from Google Drive to GitBook.
- Led the hiring process and conducted technical interviews for technical writers, followed by onboarding new team members.

Technical Writer Selectel

Mar 2018 - Mar 2021

Selectel is a trusted IT infrastructure provider with 14 years of experience, supporting over 23,000 international and local B2B clients in achieving their business goals.

- Developed 7 product presentations for various company offerings.
- Authored a white paper on hybrid infrastructure configuration using Selectel and Veeam Cloud Server products.
- Wrote more than 20 blog articles for the company.
- Collaborated with product managers to improve and expand product documentation.

Intermedia Inc. Technical Writer

Jul 2016 - Mar 2018

Intermedia is a cloud communications company serving over 140,000 businesses with an AI-powered platform that includes voice, video, chat, email, and file sharing solutions.

- Created internal training materials for the support department based on the analysis of feedback and customer support tickets.
- Wrote over 30 articles for the customer knowledge base.
- Participated in testing the new SecuriSync product by developing training materials for support staff.
- Managed the support ticket backlog, improving customer support processes.

Technical Support Engineer

Jul 2014 - Mar 2018

- Successfully completed 110 migration projects with an average customer satisfaction rating of 9.6/10.
- Received the Worry-Free Hero and Rockstar Support awards for outstanding performance.
- Trained 10 new customer support employees, improving their onboarding process and overall performance.
